
Electromagnetic Spectrum Worksheet 2 Answers

waves & electromagnetic spectrum worksheet - electromagnetic spectrum worksheet #1 1. in each of the following pairs, circle the form of radiation with the longer wavelength: a. red light or blue light b. microwaves or radiowaves c. infrared radiation or red light d. gamma rays or uv radiation 2. in each of the following pairs, circle the form of radiation with the greater frequency: **exploring the electromagnetic spectrum math worksheet** - exploring the electromagnetic spectrum lesson - math worksheet 1 exploring the electromagnetic spectrum math worksheet 1) write the names of the electromagnetic waves by their wavelengths (smallest to largest). they are shown below, but they are not in any order. x-ray infrared (heat) visible light microwave **critical thinking activity: the electromagnetic spectrum** - critical thinking activity: the electromagnetic spectrum there are many kinds of energy in the universe. the energy given off from the sun is radiant energy, scientifically called electromagnetic radiation. produced by nuclear reactions at the core of the sun, this energy streams from the surface of the sun in waves of different lengths. **unit 2 the electromagnetic spectrum - nasa** - each region of the electromagnetic spectrum pro-vides a piece of the puzzle. using more than one region of the electromagnetic spectrum at a time gives scientists a more complete picture. for example, relatively cool objects, such as star-form-ing clouds of gas and dust, show up best in the radio and infrared spectral region. hotter objects, **chapter 18 the electromagnetic spectrum and light section ...** - section 18.2 the electromagnetic spectrum (pages 539-545) this section identifies the waves in the electromagnetic spectrum and describes their uses. reading strategy (page 539) summarizing complete the table for the electromagnetic spectrum. list at least two uses for each kind of wave. **the electromagnetic spectrum - lee.k12** - this is called the electromagnetic spectrum. 5 the longer the wavelength, the less energy the em carries. visible light is just a very small portion of electromagnetic energy. visible light comes in these colors: violet, indigo, blue, green, yellow, orange, and red. red has the longest wavelength of visible light, so it has the lowest energy. **the electromagnetic spectrum - tumwater.k12.wa** - electromagnetic radiation from the given word bank. 9. look carefully at the electromagnetic spectrum shown below paying attention to the wavelengths and frequencies indicated. the visible portion of the electromagnetic spectrum has been enlarged below the spectrum. fill in the blanks with the correct colors from the visible spectrum according to **electromagnetic waves student worksheet answer the ...** - this worksheet is intended to accompany the electromagnetic spectrum powerpoint (electromagnetic spectrum.pptx) created as part of haystack observatory's ret project on physics and mosaic. the powerpoint can be used as an in-class presentation, but also could be re-envisioned as a webquest-type activity of self-directed learning. **the electromagnetic spectrum - t e harrington middle school** - the order they fit into the electromagnetic spectrum all of these are "electromagnetic waves". this means that although they appear to be very different, in fact they're all made of the same kind of vibrations - but at different . all electromagnetic waves travel at the same speed - 300,000,000 metres per second, which is the speed of light. **nasa's video tour of the electromagnetic spectrum** - nasa's video tour of the electromagnetic spectrum ... open a window with a short video clip that introduces you to the electromagnetic spectrum. complete this guide as you watch the video. you can pause the video to answer questions as you go. continue on to radio waves, microwaves, ... which waves on the em spectrum have the lowest frequency ...
