# Electromagnetic Waves Webquest Answer Key

**waves webquest - effingham schools** - waves webquest webquest steps a) click here, then read the information on each page, analyze the animations of waves and answer the questions to the right on your answer sheet (q1-q6) **name: section: electromagnetic spectrum & light - webquest ...** - electromagnetic spectrum & light - webquest ... radio waves . 4. what is the order of the electromagnetic spectrum from highest to lowest energy? use the visual below to answer question 5. ... what kind of electromagnetic radiation has the shortest wavelength? the longest? **electromagnetic waves webquest answer key** - title: electromagnetic waves webquest answer key keywords: electromagnetic waves webquest answer key created date: 11/3/2014 8:30:06 pm **name: date: period: electromagnetic spectrum webquest** - electromagnetic spectrum webquest 3: electromagnetic spectrum page 1 of 3 go to the following website and answer the questions that follow ... 3. what produces electromagnetic waves? 4. why are these waves also called "electromagnetic radiation? 5. why does electromagnetic radiation have a "dual personality"? 6. what are the particles of ... **webquest: light and the electromagnetic spectrum** - webquest: light and the electromagnetic spectrum via nasa we have learned waves transmit energy by two means, mechanical (such as the wind and slinky) and electromagnetic (light).. you will need access to the internet in order to complete the questions/activities below. text in blue means its hot text and is actually an active link to the ... **waves webquest - piketon.k12.oh** - waves webquest name: \_\_\_\_\_ period: \_\_\_\_\_ for the purpose of this webquest waves are defined as a repeating disturbance that travels through a medium. electromagnetic waves do not require a medium. answer the following questions to learn more about waves in general. be sure to use scientific websites. **electromagnetic spectrum web-quest - kathy isd** - "electromagnetic waves" and answer the following: 8. how are electromagnetic waves different from mechanical waves? 9. who was heinrich hertz and what is he famous for? scroll down to "waves or particles? yes!" 10. what is light made of? scroll down to "describing electromagnetic energy" 11. what are the 3 ways we describe ... **waves web quest - brooklyn high school** - a) what can make electromagnetic waves? b) when are electromagnetic waves formed? c) who studied how electromagnetic waves are formed? d) from the animation describe or draw how electromagnetic waves look? e) from an electromagnetic wave the electric and magnetic field is what direction toward each other? \_\_\_\_\_ 11. **waves webquest - river dell regional school district** - name% \_\_\_\_\_ date% \_\_\_\_\_ %per% \_\_\_\_\_ % waves webquest what%is%awave?% clickonthelink:% [http://gpb.pbslearningmedia/asset/lsp07\\_int\\_waves/?utm\\_source=teachersdomain](http://gpb.pbslearningmedia/asset/lsp07_int_waves/?utm_source=teachersdomain) ... **waves & electromagnetic spectrum worksheet** - waves & electromagnetic spectrum worksheet directions: use the word bank to answer the following questions. each word will be used only once. crest frequency mechanical infrared trough transverse radio gamma wavelength longitudinal ultraviolet x-rays visible light amplitude electromagnetic **electromagnetic waves student worksheet answer the ...** - this worksheet is intended to accompany the electromagnetic spectrum powerpoint (electromagnetic spectrum.pptx) created as part of haystack observatory's ret project on physics and mosaic. the powerpoint can be used as an in-class presentation, but also could be re-envisioned as a webquest-type activity of self-directed learning. **webquest: light and the electromagnetic spectrum** - webquest: light and the electromagnetic spectrum ... [anatomy of an electromagnetic wave] 1. waves we cannot actually see (unlike ripples) and those not needing a medium to travel within belong to this category of waves? \_\_\_\_\_ 2. waves ... light and the electromagnetic spectrum author: teacher **wave webquest basic electromagnetic wave properties** - what are electromagnetic waves? what is a photon? name one manufactured device or natural phenomenon that emits electromagnetic radiation in each of the following wavelengths: radio, microwave, infrared, visible light, ultraviolet, x-ray, and gamma ray. which type(s) of electromagnetic radiation do human bodies emit? which **8th grade science waves unit information - trou.p.k12** - 8th grade science waves unit information milestones domain/weight: 40% energy and its transformation content map: waves content map ... electromagnetic and mechanical waves solid s8p4d. describe how the behavior of waves is affected by medium (such as air, water, solids) and/or acce 3. how are sound **item #: electromagnetic radiation webquest (spectrum) name** - 4. do the different types of the electromagnetic spectrum travel at the same speed? if so, through what medium? 5. how are the waves ordered in the electromagnetic spectrum? 6. explain how much energy a wave has when waves have a high frequency and a low frequency. gamma rays 7. what are the strongest waves on the spectrum? what makes them the ... **electromagnetic spectrum web quest - passchemistry** - 5) how does the energy of the different waves of the spectrum vary with frequency? with wavelength? 6) what is the frequency range of uv light? of infrared light? 7) if you are use night-vision goggles, what part of the spectrum are you detecting? 8) grayson says that light is the same thing as electromagnetic radiation. do **electromagnetic spectrum webquest - mrs. high's class** - "electromagnetic spectrum" (read through both the basic and advanced pages) 1. what is the electromagnetic spectrum? 2. what is radiation? 3. write a describe each. a. visiblelight b. microwaves c. gamma-rays d. infrared e. ultravioletlight f. x-rays g. radiowaves 4. what is the order of the electromagnetic spectrum from highest to lowest ... **electromagnetic spectrum webquest - parkway schools** - list the electromagnetic waves in order, starting with the waves with the longest wavelength and going to the shortest wavelength: radio waves 6. radio waves range in length from \_\_\_\_\_ to

---

\_\_\_\_. 7. list four uses of radio waves. ... electromagnetic spectrum webquest author: **electromagnetic spectrum drawing2 - biology** - electromagnetic spectrum webquest 5: electromagnetic spectrum and telescope page 3 of 4 29. what happens if an object, like a radiator, continues to heat up? 30. what can you clearly make out when you look at the constellation orion in infrared? click "next: light " 31. how much of the electromagnetic spectrum is visible light? 32. **the electromagnetic spectrum webquest** - 1. what is the electromagnetic spectrum? how much of it can we see? 2. what are the different regions of the electromagnetic spectrum? what do all electromagnetic waves have in common? how do they differ? 3. what are some common sources of electromagnetic radiation that we use everyday? 4. **site 1: characteristics of waves - the science queen** - site 2: wave parts: .  
<http://zonalandeducation/mstm/physics/waves/partsofawave/wavepartsm> 3. what is the motion of a wave described as? 4. how are waves on a ... **electromagnetic spectrum visible light webquest** - 10. how do radio waves help support the big bang theory? infrared waves 11. what are three uses of infrared waves? visible light 12. why can't humans see the full electromagnetic spectrum? 13. order the different colors of light from the color with the longest wave length to the color with the shortest wave length. ultraviolet waves 14. **em waves webquest hhs physical science - paraglide** - electromagnetic waves webquest answer key matter is not carried with the wave! a wave can move through matter (called a "medium"), but some waves do not need a medium to be able to move. if a wave needs a medium, we call it a mechanical wave. if a wave can travel without a medium, (for example, through space), we call it **lab 10 - sound waves webquest** - electromagnetic waves, like radio waves, microwaves, light, and x-rays are examples of transverse waves. longitudinal waves travel through a medium in a direction parallel to the direction of travel of the wave. mechanical waves such as sound waves, seismic waves created by earthquakes, and explosions are all examples of longitudinal waves. **physics wave web quest name: - brooklyn high school** - physics wave web quest name: \_\_\_\_ all questions should be answered in the space provided. ... how can waves be classified on the basis of their ability, or inability, to transmit energy through a vacuum? 5. what is the difference between electromagnetic and mechanical waves? 6. which type of wave is light? 7. which type of wave is sound? iii ... **nasa's video tour of the electromagnetic spectrum** - nasa's video tour of the electromagnetic spectrum ... open a window with a short video clip that introduces you to the electromagnetic spectrum. complete this guide as you watch the video. you can pause the video to answer questions as you go. continue on to radio waves, microwaves, infrared, visible light, uv, x-rays, and gamma rays. ... **the electromagnetic spectrum—answer key - uwo** - the electromagnetic spectrum—answer key radio waves • longest wavelength lowest frequency • wavelength range: 106m to 1m • usually described by their frequency • different types of radio waves (from high f to low f are: radar, cb (citizen's band), fm, television, am, shortwave, satellite, communications **basic electromagnetic wave properties - pnhsd202** - what are electromagnetic waves? what is a photon? name one manufactured device or natural phenomenon that emits electromagnetic radiation in each of the following wavelengths: radio, microwave, infrared, visible light, ultraviolet, x-ray, and gamma ray. which type(s) of electromagnetic radiation do human bodies emit? **the electromagnetic spectrum - lee.k12** - light waves carry both electric and magnetic energy. gamma, x-rays, ultraviolet (uv), visible, infrared, microwaves, and radio waves are all the forms of em. this is called the electromagnetic spectrum. 5 the longer the wavelength, the less energy the em carries. visible light is just a very small portion of electromagnetic energy. **nasa - mission: science introduction to the ...** - 2. how does electromagnetic energy travel? 3. the very long ones are called \_\_\_\_ waves, and the very short ones are called \_\_\_\_ waves. 4. what are the three types of electromagnetic waves which are "ionizing" waves, meaning that they have high enough energy that they can knock electrons off of atoms? 5. **electromagnetic waves webquest answer key - foundum** - [pdf] free electromagnetic waves webquest answer key download book electromagnetic waves webquest answer key.pdf list of / wyndhamcondominiums **unit 2 the electromagnetic spectrum - nasa** - the longest radio waves) to fractions of a nanometer, in the cases of the smallest x-rays and gamma rays. electromagnetic radiation has properties of both waves and particles. what we detect depends on the method we use to study it. the beautiful colors that appear in a soap film or in the dispersion of light from a diamond are best described ... **click on nature of a wave - heard county high school** - wavesml can also be used on other questions) 12) why do materials absorb some frequencies of electromagnetic radiation and not others? 13) why do waves with frequencies higher than visible light hurt us while those with lower frequencies do not affect us? 14) light is sometimes described as a wave and sometimes as a particle. give evidence to **waves and optics physics webquest answer key bing** - waves webquest - river dell regional school district waves webquest name: \_\_\_\_ period: \_\_\_\_ for the purpose of this webquest waves are defined as a repeating disturbance that travels through a medium. electromagnetic waves do not require a medium. answer the following questions to learn more about waves in general. be sure to use scientific ... **electromagnetic radiation web quest - kyrene school district** - electromagnetic radiation web quest ... define electromagnetic spectrum 3. click on light facts: list 2 facts about rainbows 4. click on brain teasers and answer the following questions, restating the ... congratulations you have learned really cool stuff about waves, and stars! if you have time, click on amazing space in the lower right hand ... **waves webquest what is a wave? a. scientific answer -**

---

---

<http://micrognet.fsu/primer/java/speedoflight/indexml> 7. what is the speed of light through different mediums? a. air b. water c. crown glass (used in lenses) **heat transfer webquest - missimpson** - missimpson heat transfer webquest this website is designed to help you gain a better understanding of the process of heat transfer. you need to complete the series of activities outlined below and answer any questions in your **the electromagnetic spectrum - echalk** - 22. electromagnetic waves can travel through a vacuum. true false 23. sound waves are part of the electromagnetic spectrum. true false 24. light waves, water waves, microwaves and the 'mexican wave' are all examples of \_\_\_\_ waves. electromagnetic transverse longitudinal (answers) the electromagnetic spectrum **it's not all visible - science4inquiry** - electromagnetic waves and pictures that correspond to each energy type. blackline master #1. see sheet below for answers. 2. allow students to match the pictures to the definition of the type of electromagnetic wave they belong to (based on prior knowledge). instruct students to keep the cards on their desk once they have them matched. 3. **introduction to the electromagnetic spectrum** - the electromagnetic spectrum introduction-visible light 1 instructor's guide to lab no. 1: the visible electromagnetic spectrum goal the goal is to introduce the visible electromagnetic spectrum to students through use of materials readily available to most high school science classes. objectives **name date hr - marriottscience.weebly** - electromagnetic spectrum webquest follow the instructions below and read the information on the different web pages to answer the questions. venture to: ... how are electromagnetic waves different than mechanical waves? \_\_\_\_ 8. packets of light are called photons, what 3 characteristics does this give light? ... **sound webquest - mr. hites' science & math** - 15. scroll down to section 4, "collision of waves": when two waves traveling in opposite directions through the same medium collide, the amplitude of the resulting wave will be the sum of the two initial waves, this is called \_\_. 16. is when the amplitudes of the initial waves are in the same direction.
